With flowers, Burpee's achievements are many—Creation of tetraploid flowers, odorless marigolds, hybrid single petunias, species hybrid marigolds and double hybrid nasturtiums, to name a few.

## 6137 Burpee Hybrid Cantaloupe

82 days. (Orange Flesh) True first generation (F<sub>1</sub>) hybrid. The heavily netted fruits are distinctly ribbed, round to slightly oval, 7 in. long, 6 in. across and weigh 4 to 4 1/2 lbs. each. The flesh is deep orange, thick, firm, juicy and of the most delicious flavor. 1/4 oz. \$2.25; oz. \$8.50;  
1/4 lb. \$30.00; 1 lb. \$95.00

"I have had good results from Burpee's Big Boy Tomato. I sell them in 3 in. plant bands at \$1.00 a dozen. Everyone likes them for the large smooth tomatoes they produce. I believe that is the best tomato. You cannot improve on it. I tried out your hybrid melon this year. It really is a vigorous grower and even the cull melons had a good flavor. It will go places." *W. E. Bausum, W. E. Bausum Greenhouse, Ashville, Ohio.*

"Big Boy is the best tomato of seven varieties planted this year including two other hybrids. More vigorous and produce from early to late all large fruit." *John J. Eck's Sons, South Williamsport, Pa.*

## 5223 Burpee Hybrid Eggplant

70 days. True, first generation (F<sub>1</sub>) hybrid of outstanding qualities for home and market gardens. The plant is tall, tree-like, semi-spreading in habit, vigorous and produces continuously many fruits which are oval, medium-sized, and of a good dark purple and a high gloss. Most fruits do not touch the ground. More resistant to drought and disease than any commercial variety.

Shiny medium green cylindrical fruits are at their best eating stage when 6 to 8 in. long; flavor is excellent and texture most tender whether boiled, baked or fried. Keep fruits picked to insure a continuous yield all summer. Medium-sized bush-like compact plants.

Oz. 65¢; 1/4 lb. \$1.95; 1 lb. \$6.00

## 6023 Burpee Hybrid Cucumber

60 days. High resistance to mosaic and downy mildew are the outstanding attributes of this true first-generation (F<sub>1</sub>) hybrid white spine, slicing type cucumber. Vines are extremely vigorous, long lived and bear an abundance of well-formed green fruits of handsome appearance, 8 in. and more long, 2 1/2 in. wide, square at both ends with medium seed cavity and crispy, white flesh of excellent quality. Burpee Hybrid Cucumber out-yields open-pollinated varieties because the vines continue to produce their fruits most profusely for a long time after the others have ceased. Growers everywhere write us of the wonderful results they are having with this cucumber. Burpee Hybrid Cucumber is the leading variety of glass-house growers in the hothouse sections of the country, where high yields under glass make it a profitable variety to grow when the market demands quality at high prices. 1/2 oz. \$2.25; oz. \$4.25;  
1/4 lb. \$12.50; 1 lb. \$35.00; 2 to 9 lbs. @ \$34.00 per lb.;  
10 lbs. or more @ \$33.00 per lb.

"We have used your Hybrid Cucumber seeds for the past two or three seasons and have had excellent results. Even during the past summer when we had a severe drought we were well pleased with both the quality and quantity." *Louis Kukone, Chatham, New York.*

"I wish to state that the plants we grow are mostly sold to gardeners. We sell about 10,000 plants this way in 3 in. pots, and the Hybrid plants have almost completely replaced the other type of tomato plants. Our customers are willing to pay the difference in price, which we have to get for the Hybrid plants. This holds good for the Hybrid Cucumbers, which we also sell in pots, planted three to four seed to the pot, which is equal to a hill. We also tried the new Hybrid Cantaloupe this year and had good reports on them." *Alfred B. Zimmerman, Zimmerman's Florist, Frederick, Md.*

The average number of days required from the time the seed is sown until vegetables are ready for use is given with each variety. Where plants must first be grown, such as Eggplant or Tomatoes, the number of days to maturity is from the time plants are set in the garden. Of course, the time is average, having been obtained over a period of years in our trial grounds under different conditions; some variation is to be expected, depending on the season, locality and time of sowing. The approximate maturity dates given will show the relative time when different varieties will be ready to use.

**6137 Burpee Hybrid** (Orange Flesh) The heavily netted fruits are distinctly ribbed, round to slightly oval, average 7 in. long, 6 in. across and weigh 4 to 4½ lbs. each; often grow much bigger and heavier. The flesh is deep orange, thick, firm, juicy and of the most delicious flavor. Vines are vigorous growing and produce good early yields of large fruited melons; in fact, plantings on our farms could be distinguished easily by their F<sub>1</sub> hybrid vigor and freedom from disease.

"This past season we tried your Burpee Hybrid Cantaloupe, No. 6137. We planted one ounce, three seeds to the hill and had a hundred percent stand. When they were four inches high we had a killing frost. However, about 1/5 of them survived and to our surprise we had melons that weighed from 3 to 6 lbs. each in sufficient quantity to go to market. The quality was so good that we received 10¢ per pound when the market price was 3¢."

Burpeeana  
Lettuce

## Burpeeana Lettuce

This remarkable new lettuce is superb for growing under glass. A leading Ohio grower confirmed our own extensive trials by reporting 25% greater yield over the famous Bibb, in the same house under identical conditions. Outstanding in quality, appearance, uniformity, and slow bolting habit. Makes a good crop outdoors during the cool weather of spring and fall.

Burpeeana Lettuce has shiny deep green butterheads with very slight bronze markings, and is saleable in about 75 days. It is moderately crinkled or savoyed and is always crisp and tender, with superior very sweet flavor. Burpeeana is less subject to tipburn than most butterheads. The leaves are never bitter. It is longer standing than Bibb.

I am very glad to have this opportunity to say a word in praise of Burpee's Big Boy tomato. We are still picking some of these tomatoes while another variety planted at the same time is no longer producing; in fact, the vines were completely dried up. The tomatoes from Big Boy seed were very large and smooth. We noticed a lack of cracks in them. Carl P. Bruesile, Cincinnati 4, Ohio.

This is the third year that I have grown your Big Boy tomato. I like it very much. It makes a much stronger plant than the common tomato. This season has been very dry here and it took the hot dry weather well, keeping green and thrifty while Rutgers, Marglobe and Break O'Day died out. Would also add it is a much heavier bearer than the standard tomato. Joe Bell, Huntington, W. Va.

*This beautiful lawn on Fordhook Farms was produced from Burpee's Fordhook Finest Lawn Grass Seed*

## **4914 Burpee's Fordhook Finest Lawn Grass Seed**

**Best All-Purpose Mixture**, especially prepared from the highest quality seeds that can be produced. It makes a smooth, green, velvety lawn with a thick bottom, free from clumps. Only the very best fine-leaved and deep-rooted varieties of the most suitable grasses for making an even, thick mass of sod are used in this mixture. Sure to produce the best results under average conditions of soil and climate. A small quantity of white clover has been included; it helps to prevent the soil from washing.

### **4903 Fordhook Finest, Treated Seed**

Same high quality mixture as above treated with Arasan and Rootone. Arasan protects seed from seed decay, damping-off, blights and root rots. Rootone helps to develop a quicker, heavier, thicker, drought-resistant turf the first season.

**4911 Burpee's Sunnybrook** Splendid mixture that will give a long lasting deep emerald-green sod of velvety texture. Blend of selected grasses for a beautiful and enduring lawn.

**4913 Shady Nook** A specially prepared mixture suited for planting under shade trees or in shaded corners where grass usually does not thrive.

**4905 Terrace Sod** A blend of grasses which are deep rooted to withstand drought and hold the soil firmly and prevent it from washing away.

**4912 Golf Links** Only fine-bladed grasses which will withstand frequent close cutting and heavy trampling are used in this mixture. Particularly suited for fairways and lawns subject to hard use. Contains no white clover.

**4916 Putting Greens** Composed entirely of Bent Grasses with a preponderance of Creeping Bent. It makes a smooth, even turf that will withstand frequent close cutting and intense trampling.

**4921 MERION Kentucky Blue** Dense, dark green lawn grass resistant to heat, drought and leaf spot. This new grass spreads more quickly than ordinary blue grass, has deeper roots and can be mowed more closely without harming it.

**4904 White Dutch Clover** Gardeners who prefer an extra heavy growth of clover in their lawn should add this at the rate of 4 ozs. to every 2 lbs. of grass seed. It is advisable to sow separately in order to effect a better and more even distribution.

# Burpee's *Floradale Farms* IN CALIFORNIA

Sweet Peas have been a Burpee specialty for many years. Shown above is a harvest of sweet peas being threshed and bagged at Floradale prior to processing to clean and refine the seed. Burpee's Sweet Peas are offered on pages 58 and 59.

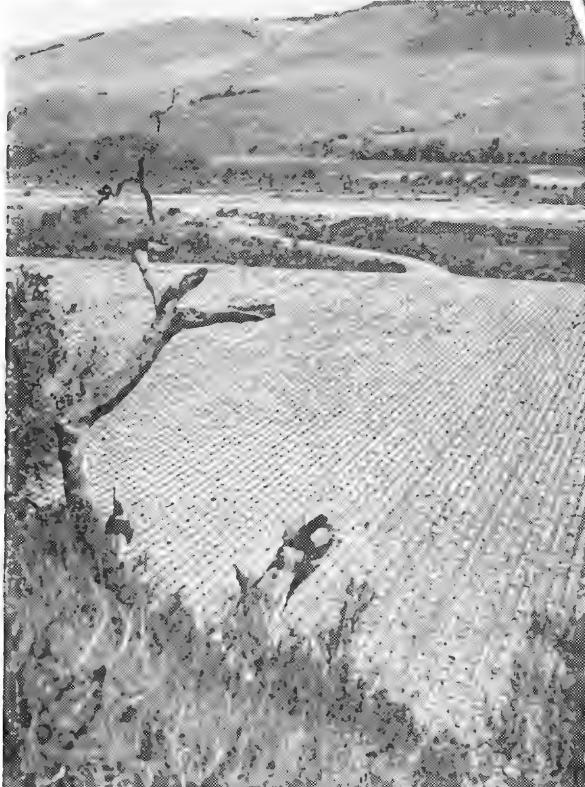

Below is an experimental block of petunias with best specimens selected for development. They are caged against insect pollination.

Cultivating a field of beans. Later the entire field will be "rogued"—removal by hand of all plants not meeting standards. This is costly, but assures top quality seeds.

Recording data on snapdragons. Old Giants in foreground; taller, new Tip Top Snaps in back.

Acres of petunias growing for seed is a glamorous scene at Floradale. Many improved new petunias, including gorgeous new first generation (F1) hybrids, are listed on pages 51, 52 and 53.

David Burpee, President of W. Atlee Burpee Co., takes notes among new selections for 1957 of Nearest-To-White Marigolds. \$10,000 for a white marigold. See page 18, Burpee Retail Catalog.

College girls hand pollinating tomato blossoms to create Burpee's famous hybrid tomato seed which is offered on pages 2 and 3.

Below is a section of the bush bean trials at Fordhook. Seeds are tested here to assure purity, quality and productiveness.

In the greenhouse at Fordhook, botany students from several colleges pollinate petunias by hand to create the lovely Burpee F<sub>1</sub> alldouble and F<sub>1</sub> single hybrids. Two new alldoubles, a salmon and a white, as well as new singles are introduced on pages 34 and 35. Other new flowers for 1957 will also be found on these pages.

This picture shows only a small part of the flower seed trials on Fordhook Farms. Both seeds and bulbs are tested at Fordhook to insure that Burpee customers get the best that grow. Additional acres are devoted to vegetable trials and breeding and experimental plantings.

Workers remove male blossoms from cucumber plants, part of the costly process in producing seed for the famous Burpee Hybrid Cucumber. Gardeners from every part of the country have written us about the amazing productiveness of this cucumber listed on page 2.

Noting beets at Fordhook. Comprehensive data is taken at each stage of growth on all vegetables so the very best strains can be selected for seed production.

### Burpeeana Extra Early

Burpeeana Asters are of uniformly upright, compact habit of growth and come into bloom extremely early. Flowers are globular, double, 3 to 4 in. across, with attractively incurved petals. They are most highly prized both in the garden and for cutting.

Plants are of erect, base branching growth, average 20 in. in height, with many stems per plant, each stem topped with a flower somewhat resembling the American Beauty in shape. Terminal flowers come into bloom at about the same time, thus making a grand showing. In our plantings, Burpeeana Asters reached the peak of their bloom two weeks or more earlier than Queen of the Market, with larger and better shaped flowers and longer, stronger stems.

### Pompon Asters

Charming, early blooming type. Plants are of uniformly upright, somewhat compact growth, about 15 in. tall, and lend themselves admirably to bedding, cutting and pot culture. The small, round pompon flowers have a few rows of short, broad outer petals, while the center petals are quilled.

## Giant Branching

### Also known as American, Semple's or Vick's Branching

From midsummer until frost these asters will produce a profusion of beautiful flowers. The blooms are quite large,  $3\frac{1}{2}$  to 4 in. across, and fully double. Plants grow  $2\frac{1}{2}$  ft. tall and branch freely, producing stems frequently 2 ft. long, which makes them especially fine for cutting. Flowers have good substance, and therefore are very long lasting.

## American Beauty

Come into bloom shortly after the Giant Branching. Plants are of branching habit, vigorous, 2 to  $2\frac{1}{2}$  ft. tall, and very profuse blooming. The flowers are globular, fully double, with prettily incurved petals and grow 4 in. and more across. Noted for their unusually long stems which make them one of the best for cut-flower purposes. We offer the mid-season type which is better suited to more general planting.

There is remarkable diversity of flower form—the highly popular carnation flowered types; the lovely ball shaped and sponge-like kind and curly chrysanthemum-flowered varieties, including several in the new Mammoth Mum grouping. A January or February indoor sowing will flower in April and May for a profitable spring crop of these wonderful cut flowers.

### Dwarf French Marigolds

Burpee has become known as "Marigold Headquarters" by originating so many of the better marigolds in general use. The fine, originator's stocks of such dwarf varieties as Spry, Sunny, Rusty Red, Naughty Marietta and, new this year, Helen Chapman and Fireglow, are valuable for pots and combination boxes. They are very popular bedding plant subjects.

## Cuthbertson Type

Come into bloom, outdoors, before the Giants but do not remain in bloom nearly so long. Plants are quite vigorous and produce many large long-stemmed blooms. Heat-resistant and therefore especially adapted to localities where larger flowered, longer stemmed sweet peas have heretofore been more or less unsuccessful. Under glass they are free flowering and prolong the spring cutting season.

3397 **Light Blue** (Hazel) Pleasing clear shade of azure-blue, abundant.  
3419 **True Blue** (Tommy) Pure medium-blue of fine form. Long stems.  
3349 **Deep Blue** (Danny) Large, dark navy blue flowers with nice fragrance.  
4377 **Concerto** Rosy crimson, changing to rich crimson. Blooms slightly waved.  
4378 **Duet** Clear, lovely salmon cream-pink flowers nicely placed in 3's and 4's.  
3389 **Lavender** (Frank G.) Lovely soft shade of delicate lavender.  
3399 **Blush Pink** (Helen) Light rose-pink on white that is most appealing.  
3392 **Salmon Pink on Cream** (Evelyn) Exquisite tone sure to please.  
4381 **Rhapsody** A clear mid-blue sweet pea of great charm. Large blooms.

3432 **White** (Janet) Remarkable pure color. Black-seeded.  
4275 **All Colors Mixed** All colors listed and others in a fine mixture.

Any of the above: Oz. 55¢; 1/4 lb. \$1.65; 1 lb. \$5.00

## Multiflora Sweet Peas

4281 **Mixed Colors** As the name indicates, the outstanding characteristic of this class of sweet peas, which distinguishes them from other varieties, is that more flowers are borne to a stem when plants are well grown. Flowers are of medium size, stems are long and strong. The number of blooms to a stem seems to vary with the color—five, six and more under favorable conditions. Many of the flowers are strikingly waved. In color they range from pure white through shades of pink and rose, orange-cerise, lavender, etc. Plants are vigorous, free blooming, rather early; flowers are wonderful for cutting.

Oz. \$1.60; 1/4 lb. \$5.00

## Burpee's Giant Heat-Resistant Sweet Peas

Burpee's Giant Heat-Resistant Sweet Peas come into bloom shortly after the Spring Flowering group with much larger flowers over a longer period. Plants are vigorous and on our Fordhook Farms were very free blooming and continued to bloom profusely after the other types had ceased.

4282 **Blue Sky** Beautiful light silvery blue; charming shade.  
4287 **Blue Velvet** Waved and duplexed, deep blue blooms.  
4292 **Flash** Bright scarlet suffused orange; dazzling, brilliant.  
4297 **Happy** Delightful shade of clear rose-pink on white.  
4296 **Lucky** Exquisite shade of warm salmon-rose on white.  
4286 **Ruffles** Very sweet scented, deep cream changing to white.  
4265 **All Colors Mixed** The above and other choice shades.

Any of the above: Oz. 90¢; 1/4 lb. \$3.25; 1 lb. \$12.00

## Burpee's Giant Hybrids

The loveliest flowers ever created. They include both first and second generation hybrids, grow 5 in. and more across, with a pleasing variation in petal formation, the majority being of the informal fluffy or ruffled type, some attractively curled, others gracefully quilled. The flowers have an airy appearance, free of stiffness.

Their beauty, stem length and keeping quality make them one of the most popular of all cut flowers. 2½ to 3 ft. tall.

Flowers are deep, 5 to 5½ in. across, larger than dahlia flowered and are composed of numerous big, flat petals curled under at the ends. Plants are strong growing, 3 to 4 ft. tall, well-branched so that an abundance of long-stemmed giant flowers is assured for cutting.

## Burpee's Super Giants

4314 **Mixed Colors** Truly giant, growing 5½ to 6 in. across, in a full range of all colors found in zinnias including some of the loveliest colors and combinations of colors ever seen in this flower. Diversity of petal and flower form, together with a most amazing assortment of solid colors and color combinations, makes them a delightful blend for garden, cutting and exhibition purposes. 3 ft.

*Burpee's Giant Hybrid Zinnias, in our opinion wrongly named Giant Fantasy or Cactus Flowered. Whatever name you prefer be sure to get your seed for these lovely cut flowers direct from the originator*

## David Burpee Zinnias

Another outstanding feature is the unusual range of colors; pastel shades predominate. Some flowers are of solid colors while others are combinations of two and three colors. Unsurpassed for cutting. 3 ft. tall.

1/8 oz. 35¢; 1/4 oz. 50¢; oz. \$1.25; 1/4 lb. \$3.75

## Giant Dahlia Flowered Zinnias

Outstanding for their long-stemmed flowers, which resemble giant dahlias, and for the lovely shades included in their range of color. They grow about 5 in. across and 2 in. and more in depth. 3 ft. high. Wonderful for cutting.
